Official Program
Welcome to the 2008 ALISE Conference!

Our 2008 conference theme, Community Engagement: Integrating Learning, Research, and Practice, focuses on community engagement in library and information science. It invites discussion of complex issues about the role of institutions in society and the relationship of education, scholarship, and professional practice. The conference is our opportunity to share pedagogical strategies for creating information professionals who see learning and research as integral to their work and to foster scholarship that anticipates, grounds, drives, and reflects meaningful professional practice.

We have an outstanding program that reflects a broad spectrum of approaches to the community engagement theme. Plenary speakers, Dr. Yvonna Lincoln and Dr. Jean Schensul, and a robust schedule of juried papers and panels are sure to inspire thought and conversation. Of course, opportunities for recognizing our colleagues’ achievements and networking with friends are built into the schedule.

It is a great pleasure to see you all again and to have this opportunity to learn, to reflect, to share, and to celebrate.

2009 Call for Proposals
OCLC and ALISE seek applicants for research grants. The OCLC/ALISE Library and Information Science Research Grant program awards up to $15,000 to foster quality research by faculty in schools of library and information science. Projects should be completed within one year, and the findings published in the public domain. Application materials are available on the OCLC web site, at www.oclc.org/research/grants/.

Submission deadline for the 2009 awards is September 15, 2008.

Explore the Attractions of Philadelphia

Welcome to Philadelphia, birthplace of the Declaration of Independence, home to some of the finest restaurants in the country, plenty of museums and nightlife, and a growing reputation for 21st century technologies.

Reading Terminal Market
This farmers’ market houses more than 80 merchants selling every imaginable variety of fresh-farm produce and prepared foods. Visitors can savor Pennsylvania Dutch breakfasts, authentic Philadelphia lunches or soul-food dinners prepared by the market’s award-winning chefs. www.readingterminalmarket.org/

Franklin Institute Science Museum
In 1824, The Franklin Institute was established as the first professional organization of mechanical engineers and professional draftsmen in the United States. The Franklin Institute has survived for more than 175 years, finding ways to adapt, flourish, and create opportunities for expanding knowledge. Evolving over the years, but retaining a passion for exploration and discovery, the heart of the Institute’s mission remains public science and technology education - through interactive exhibits, theater-based programming, educational programs and outreach. www2.fi.edu/

Philadelphia Museum of Art
As one of the largest museums in the United States, the Philadelphia Museum of Art invites visitors from around the world to explore its renowned collections, acclaimed special exhibitions, and enriching programs, both in person and online. www.philamuseum.org/

National Constitution Center
The National Constitution Center in Historic Philadelphia is America’s most interactive history museum. Located just two blocks from the Liberty Bell and Independence Hall, it is the only museum devoted to the U.S. Constitution and the story of we, the people. wwwconstitutioncenter.org/

Adventure Aquarium
DON'T JUST LOOK. TOUCH. Located on the Delaware Waterfront in NJ, we believe in giving our guests the best, most immersive experiences possible. Now you can visit five TOUCH areas and experience and TOUCH jellyfish, lobsters, sharks, and much more with our new INTERACTIVE ATTRACTIONS! www.adventureaquarium.com

The Academy of Natural Science
The Academy was founded in 1812 and is the oldest natural science research institution in the Americas. Among its early acquisitions are a collection of fossils from Thomas Jefferson, plants from the Lewis and Clark expedition, Audubon’s birds (not just paintings, the birds themselves!), and fish from Napoleon’s nephew. Now, nearly two centuries later, the Academy is recognized internationally for research, exhibits, educational programs, and its still growing collection (300,000 new specimens this year!) of 17 million natural history specimens and artifacts. www.ansp.org/index.php

Pennsylvania Academy of the Fine Arts
Founded in 1805, the Pennsylvania Academy of the Fine Arts is America’s oldest continually operational school of fine arts and museum. A recipient of the 2005 National Medal of Arts presented by the President of the United States of America, the Academy is recognized leader in fine arts education. The institution’s world-class collection of American art continues to grow and includes major works by the Academy’s faculty and alumni, both current and historic. www.pafa.org

Free Library of Philadelphia
Initiated by the efforts of Dr. William Pepper, the Free Library of Philadelphia was chartered in 1891 as "a general library which shall be free to all." Today, there are 54 branches citywide, including three larger regional libraries and the Library for the Blind and Physically Handicapped. The newly renovated building was designed by internationally recognized architect Moshe Safdie. The enhanced Central Library includes a new, enlarged children's department, a new teen center, 300 new computers with two internet browsing centers, a new auditorium, and increased access to materials such as the Automobile Reference Collection and Theatre Collection. www.freelibrary.org/index.htm

The Gallery at Market East
One of the nation’s largest urban shopping centers, spanning nearly four blocks, is home to nearly 170 stores and 40 eateries. In addition, some 50 pushcart merchants offer a variety of unique items. The Gallery is located at 1001 Market Street. www.galleryatmarketeast.com/

Fabric Workshop and Museum
The Fabric Workshop and Museum is the only museum in the U.S. creating new work in fabric and experimental materials in collaboration with emerging and internationally recognized artists. The museum also features tours, lectures, workshops and a museum shop. www.fabricworkshop.org

Introduction of Key Speaker Michele V. Cloonan, Simmons College

The Community Library Connection: Serving Democratic Needs for Information
Yvonna S. Lincoln, Ed.D., Professor, Educational Administration & Human Resource Development, Texas A&M University

To speak of the "haves" versus the "have-nots" misses important dimensions of what is now termed the "digital divide". The issue is larger than possessing or not possessing hardware, and involves as well software support, instructional support and social support in utilizing and accessing the digital knowledge resources now available. Two critical arenas for accessing all the support necessary to utilize fully the information revolution will be the joint resources of public and college/university libraries. As professors and students draw resources down to their desktop study spaces, librarians will be freed up to provide a new range of services to communities with which they partner, including: providing software support, providing instructional services in searches, search engines and metadata selection, helping non-college, community residents to access needed information on governmental affairs, medical knowledge, community agencies and other vital learning and participatory tools, and communicating the social support necessary for democratic participation in the global knowledge explosion. By providing the missing links in the digital divide, it is possible to expand the range of learning and participation possibilities of Washington and Scott Klinlger, University of North Texas
• Gender, Kay Cassell, Rutgers University
Information Ethics, Wally Koehler, Valdosta State University
• Research, Kelvin White, University of California – Los Angeles
for entire communities; however, a vigorous marketing campaign must be mounted to invite communities in, since "library anxiety" affects far more individuals than simply undergraduates.

Yvonna S. Lincoln, University Distinguished Professor of Higher Education and the Ruth Harrington Chair of Educational Leadership, has engaged in research to assess users’ perceptions of library service quality, and research which examines stakeholder perceptions of the value of college attendance in light of media criticisms of higher education. The earliest work in this field is captured in her book *Organizational Theory and Inquiry* (Sage, 1985).

Dr. Lincoln has proposed a new conceptual inquiry model, laying out the axioms of such research, and exploring the utility of non-laboratory methods for use in such a model. Her work in this area includes *The American Tradition in Qualitative Research*, Vols. 1-4, and the 1st and 2nd editions of the *Handbook of Qualitative Research*.

Dr. Lincoln is currently completing the 3rd edition of the *Handbook of Qualitative Research* and undertaking the Handbook of Critical and Indigenous Methodologies.

Users and Librarians Engaging in Virtual Spaces: Using Critical Incidents to Inform Practice and Education in Chat Reference
This session highlights findings from the final phases of a two-year grant project comparing the perceptions of VRS users and librarians by means of the Critical Incident Technique.
Marie L. Radford, Rutgers University
Lynn Silipigni Connaway, OCLC Online Computer Library Center, Inc.

Rights and Rites of Access to Virtual Communities
Libraries supply books and they also support extended access to books through the provision of reading spaces, thus enabling the acquisition of both tacit and explicit reading skills. Access to other media is not so well supported. This session explores the importance of extensive exposure to digital media, through both work and play, as profoundly important for the development of full, rich literacies.
Margaret Mackey, University of Alberta

Second Life: Exploring the Immersive Instructional Venue in LIS Education
This presentation discusses a two-stage study that examines how Second Life (SL) can be used in delivering Library and Information Science (LIS) education. Findings indicated that there
were interests in using SL to teach classes in areas like reference, library services for children and young adults, and library history. Lili Luo and Jeremy Kemp, San Jose State University

**Building a Metadata Education and Research Community through MERIC: Demo and Stakeholder Input**

“When I took my first class in the doctoral program, a professor remarked that being a PhD student was about ‘learning how to be, not how to do.’ I didn’t understand it at the time, but now five years later I look back on the iSchool’s program as a transforming experience.”

**Keynote Address 2: Community-based Research Partnerships and Experiential Learning**

Jean J. Schensul, Senior Scientist & Founding Director, Institute for Community Research

Approximately 50% of the world lives in resource poor environments, even in countries and communities where information technology provides the main source of employment. Urban dwellers, in many countries now more than 75% of the total population, are highly attuned to the effect of information and communications technology on their lives Libraries and cybercenters constitute primary sources of information, research and opportunity in central cities and low income neighborhoods. Participatory Action Research is an approach that integrates learning, research methodology, and skills development through the practice of service and social change. This talk will outline a general methodology for PAR with youth and adults that has the potential to enhance libraries as learning centers while mobilizing communities for advocacy and social/infrastructural improvement in the U.S. and elsewhere.

Jean J. Schensul is a medical/educational anthropologist with a mixed methods and intervention research approach applied to urban communities and schools in the U.S (Puerto Rican, African American, Cuban and Mexican communities), and internationally in Peru, Sri Lanka, Mauritius, India, Senegal and China. Dr. Schensul has been president of the Council on Anthropology and Education, and the Society for Applied Anthropology, and is a member of the Long Range Planning Committee of the American Anthropological Association. She is the recipient of a number of national and local awards including the American Anthropological Association Solon T. Kimball Award for community research in Hispanic communities, has reviewed for NIH, NSF and other funders since 1996 and has published widely in books and peer reviewed journals.

STN Library and Information Science Training Program!

STN offers a special program to teach students in Library Schools and Information Science Programs about STN!

*STN is the premier online scientific and technical information service* dedicated to meeting the needs of information professionals throughout the world. STN provides access to a wide range of databases and has been used by searchers in commercial, government, and academic settings for more than 25 years to access the highest quality scientific and technical data sources.

STN searching is a key skill for Library School graduates. Our goal is to help students become proficient STN searchers, so that they can list “knowledge of STN” on their resumes.

The STN Library and Information Science (LIS) Training Program is designed for use in many types of classes and includes:

- Student handbooks, with hands-on practice problems and solutions
- STN login IDs for faculty and students for online practice
- Access to STN via STN Express® or STN® on the Web™
- Training and access to the CAS Help Desk

The STN LIS Training curriculum, training, and online searching will be offered to Library and Information Science Programs at no charge.

Get more information at www.cas.org/stnlis.html or by contacting CAS Customer Care at 1-800-753-4227.

DigIn
A NEW GRADUATE CERTIFICATE PROGRAM IN DIGITAL INFORMATION MANAGEMENT

Digital information is not a future information professionals should be planning. It is the current reality that we must actively address. The accelerating growth of diverse digital collections clearly affords new opportunities for professionals who are well-grounded in traditional information management principles but who also possess the technical skills needed to curate digital objects.

The online, six-course DigIn program provides new students and working professionals with a balanced mix of content that includes practical applied technology skills along with a foundation in the theory and practice of building and maintaining today’s digital collections.

Major funding from the Institute of Museum and Library Services has made a number of scholarships available for DigIn students. See the DigIn website for more information.

Interested in teaching on-line?
The School of Library and Information Science at San José State University is seeking applications for part-time faculty members interested in teaching on-line courses, especially in information retrieval, management, and information and society.
We use BlackBoard and Elluminate web conferencing. Please visit http://slisweb.sjsu.edu/ for course offerings and class schedules.
A twenty hour on-line program in teaching by distance is required for new faculty.
Send electronic resume and indicate which courses you would be available to teach. Ph.D. is preferred. Please contact Dr. Linda Main at lmain@slis.sjsu.edu.
**Resolutions**

Written copies of all resolutions, including resolutions contained in committee reports, must be given to the membership before they are to be presented to that body for action. To permit this, text must be submitted to the Governance Committee 24 hours in advance of presentation. A resolution that has fiscal implications must be submitted to the President as well as the Governance Committee 24 hours before it is to be voted on so that the Budget Committee can provide information on fiscal implications.

Resolution approved January 13, 1979, limits resolutions to statements on substantive matters relating to library education and the profession of librarianship to be voted on by membership.

**Governance Committee**

- **John Budd**, University of Missouri – Columbia *(chair)*
- **Elizabeth Aversa**, University of Alabama
- **Ken Haycock**, San Jose State University
- **June Lester**, University of Oklahoma
- **Louise Robbins**, University of Wisconsin-Madison

**Vision**

By 2010, ALISE will be the visionary organization in Library and Information Science education. The Association will be known for its unique purpose, build its strength and communicate that strength through vision, voice and visibility.

**Mission**

ALISE promotes excellence in research, teaching and service for Library and Information Science educators through leadership, collaboration, advocacy and dissemination of research.

**Enduring Purpose**

ALISE promotes research that informs the scholarship of teaching and learning for Library and Information Science, enabling members to integrate research into teaching and learning.

**Strategic Directions 2007-2010**

1. Achieving the Association’s unique purpose through focus on the scholarship of teaching and learning and the enhancement of research;
2. Promoting the Association’s unique purpose through improved collaboration and marketing and communication of the ALISE vision;
3. Delivering relevant, high quality services and developing strategic new initiatives to ensure membership growth to develop the Association’s unique purpose;
4. Enhancing revenue streams to extend the Association’s unique purpose through planned development and advancement and new initiatives;
5. Providing and developing leadership for the Association to ensure voice, vision and visibility.
